

# LANDTEX™

GEO FABRIC THAT WORKS

A thicker version of the WEEDTEX membrane, providing superior weed control in most types of landscape project. LANDTEX is an eco-friendly weed control solution as it effectively suppresses weeds without the use of chemicals. LANDTEX allows nutrients (including liquid feed and fertilisers), water and air to permeate creating a healthy and fertile soil, whilst preventing weeds getting the light they need to grow. LANDTEX is ideal for use as a weed suppressant in planting schemes as it can be easily cut without fraying, for planting through. LANDTEX should then be covered with a 50mm layer of bark or other mulch or rounded cobbles/decorative stone. It is recommended that a heavier duty fabric is used beneath sharp/angular aggregates/stone or areas subject to pedestrian traffic.

## INSTALLATION GUIDELINES

1. Prepare the area where the fabric is to be laid by strimming any existing vegetation down to ground level.
2. Remove any stalks or sharp objects that could pierce the fabric.
3. For areas badly affected by weed growth, apply a suitable weedkiller.
4. Lay the LANDTEX fabric out and ensure joints are overlapped by a minimum of 100mm.
5. Secure using EXTRAFIX fixing pegs. The best way to secure the edges of the fabric is by 'spitting' or 'trenching' the fabric 100-150mm into the soil.
6. Cover the fabric with a layer of bark or other mulch, rounded cobbles/decorative stone by a minimum of 50mm.

### NOTES

1. LANDTEX is a landscape fabric designed to suppress weeds, but does not eliminate the need for surface weeding as a result of seeds dropped by birds etc growing in the surface covering.
2. LANDTEX will suppress most weeds but particular attention should be paid to very invasive weeds/grasses such as Mare's Tail, Bindweed, Crocosmia, Ground Elder, Couch Grass, nettles, brambles and some bulbs. A weedkiller should be applied first and then we would recommend laying a double layer of LANDTEX or a double layer of the surface covering (e.g. min 100mm of bark) or both for severe areas.

## PRODUCT SIZES

CODE	PRODUCT	WIDTH	LENGTH	AREA
LAN1	Mini Roll - For smaller size projects	1.0m	15m	15m <sup>2</sup>
LAN10	Midi Rolls - For medium size projects	1.0m	50m	50m <sup>2</sup>
LAN20		2.0m	25m	50m <sup>2</sup>
LAN25		2.0m	50m	100m <sup>2</sup>
LAN100	Maxi Rolls - For larger size projects	1.0m	100m	100m <sup>2</sup>
LAN150		1.5m	100m	150m <sup>2</sup>
LAN200		2.0m	100m	200m <sup>2</sup>
